Ujjawal Bhardwaj

+91 8218301131 | ujjawal.bhardwajj@gmail.com | LinkedIn | GitHub | LeetCode | Portfolio

Professional Summary

Full Stack Developer with hands-on experience building and deploying web applications using **JavaScript, TypeScript, React.js, Node.js, Express.js, and MongoDB**. Experienced in developing **REST APIs, authentication systems, responsive user interfaces, and real-time applications**. Familiar with **System Design Fundamentals**, with a focus on writing clean, maintainable code and collaborative problem-solving.

Education

Arya College of Engineering & IT, Jaipur, Rajasthan — Expected 2027
Bachelor of Technology in Computer Science — CGPA: 7.70/10.0

The Doon Valley Public School, Saharanpur, Uttar Pradesh — 2023
Senior Secondary (Class 12th) — 83.8%

Technical Skills

Programming Languages: JavaScript, TypeScript, Java, SQL
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, RESTful APIs, OAuth, Socket.io, WebRTC
Databases: MongoDB, PostgreSQL
Tools & Practices: Git, GitHub, Linux, Postman
Core CS: Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Projects

DevOS – Developer Productivity Platform — Github | Live — Apr 2026
Tech Stack: React.js, TypeScript, Node.js, Express.js, MongoDB, Tailwind CSS, React Flow, JWT, Google OAuth

- Developed a full-stack productivity platform with modular application architecture, supporting **project management, Kanban boards, task tracking, and workflow automation**.
- Designed and implemented **15+ REST APIs** for application features and integrated **JWT authentication and Google OAuth** to support authenticated user workflows.
- Integrated the **GitHub REST API** and queried LeetCode data through **GraphQL** to display developer activity and coding statistics within the application.
- Built a **visual, node-based workflow interface** using React Flow, enabling users to create and manage connected workflows.
- Managed source code using **Git/GitHub** and deployed the application for browser-based access.

FrogMeet – Real-Time Video Conferencing Platform — Github | Live — Jul 2026
Tech Stack: React.js, TypeScript, Node.js, Express.js, Socket.io, WebRTC

- Built a full-stack real-time communication application using **React.js, TypeScript, Node.js, and Express.js**, supporting peer-to-peer audio/video communication through WebRTC.
- Implemented a **Socket.io signaling service** to coordinate participants, handle meeting events, and exchange real-time messages.
- Developed **meeting-room workflows** using unique room IDs and socket-based event handling to support multiple meeting sessions.
- Integrated frontend and backend components, handling socket connections and real-time events, and deployed the frontend on Vercel.

Internship

Agentic AI Intern, GRRAS Solutions Pvt. Ltd. — Jun 2026 – Jul 2026

- Developed an AI-powered application integrating Large Language Models (LLMs) into application workflows, using iterative testing and debugging to improve functionality.
- Applied **Object-Oriented Programming principles** to develop AI agents supporting multi-step reasoning, task execution, and tool invocation.
- Integrated external **REST APIs and automation workflows** to support data exchange, task execution, and application logic.

Certifications

- Red Hat Certified System Administrator – RHCSA (Linux)
- CRUD Operations, Schema Design Patterns and Anti-patterns – MongoDB
- Mastering React and Node.js Firebase Authentication – Udemy
